Please provide your name, daytime phone number, and company and society affiliation.

Program Description: Sartorius and Engineers Joint Committee of Long Island (EJCLI) have organized this technical seminar as a service to Long Island's Biopharmaceuticals industry.

CAR-T (Chimeric Antigen Receptor T Cell) Therapy is a new and promising type of treatment in which T-cells are taken from a patient's blood and changed in a laboratory to attack cancer cells.

- *A CAR-T Primer: What it is and where it is headed – Paul Dal Pozzo*
- *Commissioning, Qualification & Validation Considerations for CAR-T Products – Aaron Weinstein*

The presentations will begin promptly at 6:30PM and will last about 1.5 hours.

After the seminar, a site tour of our Application Center with an overview of Sartorius Biotech products and services will be available.

Speaker Bios:

Paul Dal Pozzo is a Strategic Market Manager for the Regenerative Medicine Applications Unit of Sartorius. In that role Paul works on a variety of different projects spanning product portfolio alignment, new product development, business development and marketing collaborations. Paul started work at Sartorius in May 2017. Prior to Sartorius, Paul worked for Terumo BCT in their Cell Therapy Group and has had a long career in various roles within the biotech and medical device industries.

Aaron Weinstein is Senior Director of Validation Services at Integrated Project Services. He has over 20 years' experience in commissioning, qualification and validation within the pharmaceutical and biotech industries. Mr. Weinstein's experience includes: Planning and executing commissioning and qualification projects, preparation of master plans, performing quality risk assessments, quality audits and remediation. Mr. Weinstein has a broad range of experience in the facilities, utilities, equipment and automation related to CAR-T manufacturing, biotech bulk manufacturing, bulk drug manufacturing and specialized packaging.

Sartorius background information:

Sartorius is a leading international pharmaceutical and laboratory equipment supplier and has been around for over 140 years. With our wide array of products, we help our customers in the biopharmaceutical industry to manufacture innovative medications safely and economically. In laboratories for research and quality assurance, the name Sartorius is synonymous with premium lab instruments, consumables and services that make sophisticated tasks easier and more efficient. As partners, we understand our customers' requirements down to the last detail and are already working on solutions to meet their needs. Sartorius conducts its operating business in two divisions: Bioprocess Solutions and Lab Products & Services. The divisions each combine their respective businesses for the same fields of application and customer groups.
