The Journal of Electrochemical Energy Conversion and Storage - Formerly the Journal of Fuel Cell Science and Technology

Starting January 2016, the new Journal of Electrochemical Energy Conversion and Storage, formerly the Journal of Fuel Cell Science and Technology, will focus on processes, components, devices and systems that store and convert electrical and chemical energy. This journal publishes peer-reviewed archival scholarly articles, research papers, technical briefs, review articles, perspective articles, and special volumes.

Manuscripts for the newly titled journal are welcomed, but not limited to the following areas:

• Electrochemistry
• Electrochemical engineering
• Electrocatalysis
• Novel materials and structures
• Analysis and design
• Components
• Devices
• Systems
• Balance of plant
• Numerical simulations
• Analytical simulations
• Materials characterization
