

## Directions to parking for the ASME Belle Isle Redesignation Ceremony

The landmark site is in front of the GE Gas Turbine Technology Laboratory (GTTL) building, within the GE campus on Garlington Rd. Refer to the map on the next page. Attendees should use the “3<sup>rd</sup> G.E. Entrance” on Garlington Rd. at the north edge of the campus. This intersection is within sight of the Roper Mountain Rd. intersection. Parking will be in the “GTTL Parking” area (red circle). Follow the entrance road from Garlington Rd. to the stop sign (“Open Access” label on the map), and then carefully proceed straight through this complex intersection. Please note there are 6 roads that come together at the intersection. After you pass through the intersection there should be a parking lot (not the one you park in) on your right (see map). If not, you took the wrong roadway, go back and pick the right one. Follow the road to the end which opens into the GTTL Parking lot. You will enter the plant facility at the GTTL gate (red star on the map). If you are lost, call me at 864-382-0626. Attendees may arrive beginning at 1:30 PM and should plan to be on site by 2:00 PM at the latest.
