

# ASME Family Event

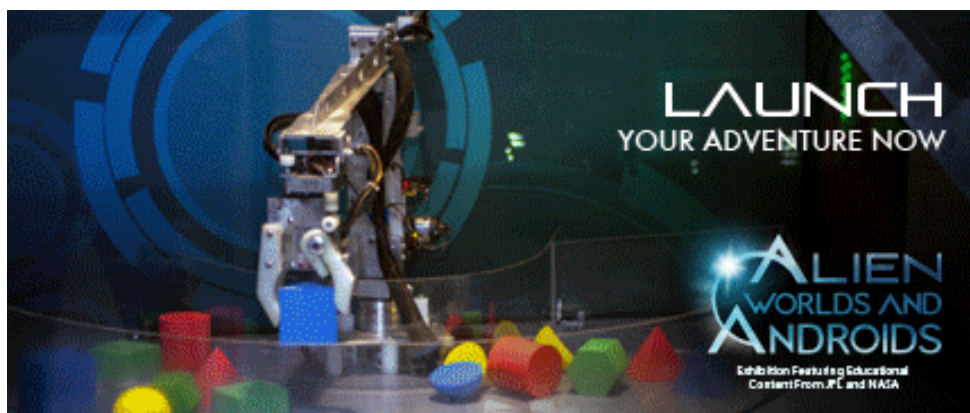

## Rochester Museum & Science Center

### Saturday December 7th at 1pm

Come face-to-face with worlds far beyond our own and discover how living creatures can dwell in some of the most unlikely places. Interact with the exhibition through touch-screen games or maneuver a mechanical arm, among other engaging experiences. Amid the science are full-size Hollywood models you are sure to recognize, including C-3PO from Star Wars, the monster from Alien, T-800 from The Terminator and Iron Man. Don't forget to take a photo with Robby the Robot!
